

# SALONEE SISODIYA

AI SOLUTIONS CONSULTANT | ENTERPRISE GENAI | RAG | WORKFLOW AUTOMATION | RESPONSIBLE AI

LinkedIn: [linkedin.com/in/salonee-s-201564399](https://www.linkedin.com/in/salonee-s-201564399) | GitHub: [github.com/salonee-sisodiya/ai-solutions-consultant-portfolio](https://github.com/salonee-sisodiya/ai-solutions-consultant-portfolio)

## PROFESSIONAL SUMMARY

Computer Science graduate with a portfolio focused on Enterprise Generative AI, Retrieval-Augmented Generation (RAG), workflow automation, and responsible AI solution design. Experienced in translating business problems into practical AI-enabled workflows using low-code/no-code platforms, structured business rules, human-in-the-loop controls, and clear technical documentation. Strong analytical writing, problem framing, and systems thinking.

## CORE COMPETENCIES

- Enterprise AI Consulting & Business Analysis
- AI Workflow & Business Process Automation
- Responsible AI & Human-in-the-loop Controls
- Google Gemini Embeddings & Vector Search
- Business Rules, Validation & Structured Data
- Generative AI, RAG & Prompt Engineering
- Solution Architecture & Workflow Design
- Flowise, n8n, WhatsApp Cloud API
- LLM-based Information Extraction
- Technical Documentation & GitHub

## SELECTED AI PORTFOLIO

### Enterprise RAG Knowledge Assistant

Designed and implemented a multi-document RAG assistant in Flowise to help users retrieve information from enterprise-style PDF documentation.

- Built ingestion, chunking, embeddings, vector retrieval, conversational memory, and LLM response flow.
- Used Google Gemini embeddings and vector search to support contextual responses grounded in uploaded documents.
- Published architecture diagrams, repository materials, and a demonstration video.

### AI Ticket Triage System

Designed an AI-assisted support-ticket triage workflow combining language understanding with deterministic business controls.

- Defined intent classification, routing logic, business rules, confidence handling, and human review checkpoints.
- Positioned AI as an assistive layer while retaining workflow control over operational decisions.

### AI-assisted Examination Evaluation

Designed a responsible AI-assisted evaluation workflow for large-scale examinations with human approval.

- Combined OCR, semantic comparison, rubric-guided scoring, and human review to support consistent evaluation.
- Focused the solution on controlled AI assistance rather than fully autonomous high-stakes decisions.

### Amrit Water — WhatsApp AI Sales & Order Assistant

Designed and implemented a WhatsApp-based AI order assistant for a wholesale packaged-water business using Meta WhatsApp Cloud API and n8n.

- Built the workflow from WhatsApp webhook and message processing through AI order extraction, structured order data, business-rule validation, persistence, and customer confirmation.
- Used an LLM to interpret natural-language orders and extract order intent, bottle size, carton quantity, delivery details, and customization requirements.
- Kept business-critical execution deterministic: validation, order status, persistence, and confirmation remain controlled by the workflow rather than the language model.
- Created a sanitized public n8n workflow, solution design documentation, BRD, architecture evidence, and WhatsApp order-confirmation demonstration.

## PROFESSIONAL BACKGROUND

### Independent Research & Strategic Problem Solving | 2019–2024

- Completed five years of UPSC Civil Services preparation, developing structured reasoning, policy analysis, analytical writing, systems thinking, resilience, and ethical decision-making.
- Managed disciplined self-directed learning across technology and multiple analytical domains.

## EDUCATION

B.E. Computer Science, Medicaps Institute of Science & Technology, Indore | 2019

## CERTIFICATIONS & LEARNING

- Google Cloud Skills Boost: Generative AI, LLMs, Responsible AI, Prompt Engineering
- Self-directed learning: Flowise, RAG, Vector Databases, Workflow Automation

## TARGET ROLES

AI Solutions Consultant • GenAI Consultant • AI Business Analyst • AI Implementation Consultant
