- * Event organizers
- * Individuals

Current Ordering Process

How does an order come ? -mostly calls and very few whatsapp msg

Example:

Customer calls

↓

asks price

↓

asks availability

↓

shares quantity

↓

shares location

↓

order confirmed manually

Pain Points

1. How are orders placed?

Mostly through calls and we also get whatsapp messages but they are very few

2.What questions are repeated every day?

New customers mostly ask about pricing and available bottle sizes (200 ml, 500 ml, 1 L).

Regular customers usually just call to place carton orders.

3. What wastes the most time?

Answering new customer queries and coordinating deliveries.

4. How many calls do you get daily?

Around 15–20 calls per day.

5. Do customers message at night?

Very rarely.

6. Do customers ask the same prices repeatedly?

Mostly new customers ask about prices. Regular customers usually don't.

7. Are orders ever forgotten?

Sometimes due to stock availability, but we make sure to fulfill them as soon as stock is available.

8. How do you store customer information?

Customer contact details are saved in the phone. Credit, cash payments, and carton records are maintained in a diary.

9. Bottle sizes available?

Currently, we mainly supply 500 ml bottles.

10. Do you offer customized bottles?

Yes, custom labels/bottles are available for orders above 50 cartons.

11. Do you collect customer information?

Yes. We also ask new customers about the brands they're currently using, the prices they get, what they're not satisfied with, and their feedback on water quality and bottle design.

12. Delivery locations?

We deliver in Pratapgarh, Mandsaur, Pipliya Mandi/Piploda, and nearby local areas.13. How are payments collected?

Mostly through UPI, bank transfer, or cash. Some regular customers are given credit, and payment is collected later.

14. How do you confirm orders?

We confirm the order on call and inform the customer about the expected delivery time.

15. What are the common delivery issues?

Sometimes stock is unavailable or the vehicle gets delayed, but we inform the customer in advance.

16. Do customers reorder frequently?

Yes. Most hotels, restaurants, and shops place repeat orders every few days based on their stock.

17. What customer details are important?

Customer name, phone number, shop name, location, payment type (cash/credit), and previous order history.

18. What would you like to automate?

Price inquiries, order booking, customer records, payment reminders, repeat order reminders, and delivery tracking.

Functional Requirements

The AI Assistant should be able to:

- * Answer FAQs
- * Share bottle sizes
- * Explain customized bottle options

- * Collect customer information
- * Capture order details
- * Ask follow-up questions if information is missing
- * Save enquiries
- * Notify the owner
- * Transfer unusual cases to a human

Success Metrics

measurable goals, for example:

- * Instant replies to common questions
- * Capture every enquiry in one place
- * Reduce repetitive phone calls
- * Save staff time
- * Improve response consistency
